PROFESSIONAL EXPERIENCE

MediSeba Company Limited | Talaimari, Rajshahi

Assistant Operation Officer (Web & IT) | June 13, 2026 – Present

- Contribute to MediSeba Healthtech Enterprise web application development and ongoing Web/IT operations.
- Support development, enhancement, maintenance and issue resolution for the digital healthcare platform.
- Collaborate with cross-functional teams to deliver reliable, secure and user-friendly web applications.
- Work on feature implementation, performance optimization and operational support for web applications.

TEXAGIG-IT | Dinajpur

Software Engineer – Web Applications | 2023 – Present

- Designed and developed scalable full-stack web applications using Next.js, React, Django and Laravel for international clients.
- Built custom CMS, e-commerce, portfolio and business systems with secure REST APIs and PostgreSQL/MySQL databases.
- Integrated payment gateways, Supabase, authentication systems and SEO tools; implemented production-ready workflows.
- Optimized applications for performance, security and scalability; worked with Linux, Git and CI/CD pipelines.

Texabit Sdn Bhd | Malaysia

Full Stack Web Developer | 2021 – 2022

- Collaborated on an ERP-based Brighton School Management System using Laravel.
- Developed CRUD modules for students, staff, classes, attendance and academic records with clean MVC architecture.
- Designed database migrations, relationships and seeders for scalable MySQL structures.
- Integrated backend logic with frontend components; participated in testing, bug fixing and feature enhancements.

SELECTED PROJECTS

MediSeba – Digital Healthcare Platform

Technology: Next.js, TypeScript, PostgreSQL, Redis, Tailwind CSS, Node.js

- Contributing to a digital healthcare platform with doctor appointment, medicine, emergency and patient-facing workflows.
- Implemented secure authentication, role-based access, real-time features and responsive healthcare experiences.

Live / Repository: https://mediseba-web.vercel.app/

AI-Driven Assistance for Hearing & Speech Impairments (v1.0.0)

Technology: Kotlin, Jetpack Compose, CameraX, MediaPipe, TensorFlow Lite, TTS, Python

- Built a real-time on-device Android application translating hand gestures and facial expressions into synthesized text and speech.
- Implemented 36 ASL signs, emotion detection, English/Bangla support and SOS functionality.

Live / Repository: https://github.com/git-sajib/ai-hearing-speech-assistant/releases/tag/v1.0.0

PulseChat – Real-time Chat Web App

Technology: Next.js, TypeScript, Tailwind CSS, Socket.io, REST API

- Built real-time 1-to-1 and group chat with user authentication, search, optimistic UI and smart auto-scroll.
- Implemented message status, responsive UI/UX and clean API normalization.

Live / Repository: https://chat-app-assignment-three.vercel.app/

TEXAGIG IT Solutions – IT Support & Service

Technology: Next.js, Supabase/PostgreSQL, Vercel, Git

- IT service platform with dynamic blog/course features, authentication, CRUD operations and responsive UI.
- Deployed on Vercel with CI/CD and version control using Git.

Live / Repository: https://www.texagig.com/

TS Tour & Travels – Malaysia Based Travel Agency

Technology: Next.js, MongoDB, Vercel, Git

- Modern tour and travel booking platform with dynamic content management, booking flow and responsive UI.
- Implemented production-ready deployment workflow.

Live / Repository: https://www.tstourtravels.com/

Saba Halal Foods – Japan-Based Grocery Shop

Technology: WordPress, PHP, JavaScript, WooCommerce

- Developed an e-commerce website with region-based delivery, product management and smooth shopping experience.

Live / Repository: https://sabahalfoods.com/

Evetify – Event Management System

Technology: PHP, CRUD, Role-based Access

- Implemented event registration, role-based access and CSV/Excel export.

Live / Repository: https://eventmanagement.texagig.com/
